MATHEMATICAL
MODELS &
APPLICATIONS**

CONTENTS

Vol.9, No.1, 2024

D.A. Koç, Y.S. Gasimov, H. Bulut (pp.5-13)

A study on the investigation of the traveling wave solutions of the mathematical models in physics via $(m + (1/C'))$ -expansion method

A.B. Fimba, Solimun, A.A.R. Fernandes (pp.14-26)

Survival analysis modeling on credit risk with latent variable indicator models

A.Kh. Khanmamedov, A.F. Mamedova (pp.27-34)

Transformation operators for the perturbed Hill equation with complex coefficients

A. Ghazaoui, S. Bidah, O. Zakary, M. Rachik (pp.35-53)

Control theory approaches to optimize information flow in the face of uncertainty and conflicting data

G. Panahov, E. Abbasov, A. Ehmedov, I. Mamedov (pp.54-67)

Modelling of internal transformations of gas phase in porous media

A. Al édamat, W.A. Khan, U. Duran, C.S. Ryou (pp.68-92)

Construction for q -hypergeometric Bernoulli polynomials of a complex variable with applications computer modeling

R. Khaji, F. Yaseen, R.I. Khalil (pp.93-104)

Solution of fuzzy Volterra integral equations using composite method

Kh.E. Abbasova (pp.105-109)

Spectral analysis of the Stark operator with a step-like potential

N.K. Akhmedov, S.B. Akbarova (pp.110-120)

On the problem of the theory of elasticity for the radially inhomogeneous transversal isotropic cylinder with a fixed lateral surface

R. Nithya Raj, R. Sundara Rajan, T. Rangunathan, N. Muthuvairavan Pillai,

S. Balamuralitharan (pp.121-129)

Partition dimension for line graph of honeycomb networks and Aztec diamond networks

G. Vanaja, K. Ganesan, L. Rathour (pp.130-146)

Solving fuzzy nonlinear programming problems with exterior penalty fuzzy valued functions
